-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. With respect to Claim 2: the phrase s “a limited access count being...” and “a complete access account being...” is indefinite. It is unclear to the examiner if these limitations are actually being claimed. Are these the limited access accounts or complete access accounts mentioned earlier in the claim?

### *Claim Rejections - 35 USC § 101*

4. Claims 1 and 2 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis for this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the “progress of science and the useful arts” (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to

pass muster, the recited process must somehow apply, involve, use or advance the technological arts.

In the present case, claims 1 and 2 only recite an abstract idea. The recited steps of merely managing accounts and creating sub accounts, does not apply, involve, use or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pen and paper. These steps only constitute an idea of how to manage accounts for shipping transactions.

Additionally, for a claimed invention to be statutory, the claimed must produce a useful, concrete, and tangible result. In the present case, the claimed invention produces a system which manages accounts for shipping transactions (i.e., useful and tangible).

Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claims 1 and 2 are deemed to be directed to non-statutory subject matter.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3629

6. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Cook (6,853,987).

7. With respect to Claim 1: Cook discloses the use of a method used to provide a master account to a customer (See abstract, Column 3, lines 41-56), the master account providing the customer with the ability to create and alter sub accounts (See Figure 3, with corresponding detailed description), the master account also permitting the customer to maintain and manage a database (50) of shipping information and the master account permitting customer to manage billing (Cook discloses the system is capable of collecting account information, such as credit card information, therefore it is the examiner's position that the system or method of Cook is fully capable of generating billing).

8. With respect to Claim 2: Cook discloses the subaccounts are complete access accounts or limited access accounts (see abstract).

9. With respect to Claim 3: Cook discloses the use of a system with a server and a network (column 4 lines 43-55), a database (50) and programs or software that enable a user to maintain and manage accounts for shipping (Column 4, lines 56-67).

### *Conclusion*

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wells et al. (6,901,387) discloses the use of a an electronic purchasing method with an accounts system, and Demoff et al. (6,456,984) discloses the use of a method which manages accounts for multiple people.
